Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The Original Energy theory postulates that the Universe is originated from cold, fold, compressed embryonic energy formation; ironically from the no weight, no charge, the tiniest element, the photon. Through Photogenesis procedure a mutual generation between photon and electron, from ultra energetic to less energetic stage, photons and electrons constitute every existence, including life inside the universe. Under the guidance of the Original Energy codes, photons derive, develop, govern, transform and rule the universe. It means the universe did not derive from infinitely hot, dense matter, the primeval atom, after the singularity and the Big Bang event. The mass dependent gravitational force is not the primordial force. Proton, neutron and electrons might occupy only 4 of the volume of an atom; the rest of it is electromagnetic energy. Matter only constitutes 4 of the volume of the entire universe; the rest is electromagnetic energysphere emanates from de nucleus of every heavenly body and the universe, making it isotropic, homogeneous and stable. Hence, energy is the most important part of the universe! As material existence, heavenly bodies, life continually...

### Reviews

*This is basically the greatest pdf i have got go through right up until now. It normally fails to cost excessive. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

*An incredibly great book with perfect and lucid answers. Better then never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).*
