Trafford Publishing, Canada, 2005. Paperback. Book Condition: New. 223 x 147 mm. Language: English . Brand New Book ***** Print on Demand *****.Vostok Station, the coldest recorded place on earth, a Russian research facility deep in Antarctica that sits on a dome of ice over 5000 feet deep. A place unique not just because of record cold temperatures but because of what lies beneath the ice, Lake Vostok, a fluid mass larger than Lake Ontario, nearly 2000 feet deep. Renegade Russian and Chinese scientists drill through the ice into the lake, discovering a secret that has been trapped there for millions of years. Compressed by trillions of tons of ice, the lake water is saturated in oxygen and explosive natural gasses. When exposed to low atmospheres, the water instantly boils into gas. Beneath that mix, the earth s crust, stretched by the huge mass of lake and ice, has laid bare the world s largest oil and gas reserve, held in check only by the weight above. The discovery begins a chain of events that spiral into the biggest massing of military forces seen since the Second World War. And then the unthinkable happens. A blinding flash of light and an enormous electro magnetic pulse rips out from the northeast end of the lake, sealing off Vostok from the rest of the world. The Russians and Chinese blame the U.S. The event triggers a military race to claim the ice. Amidst this, two brothers, Brian and Lance Hamilton find themselves dragged into the unfolding nightmare. Colonel Brian Hamilton caught in the electro magnetic pulse, witnesses the annihilation of the Vostok research station from a cruise missile strike and the ignition of the wellhead that begins a count down to dooms day. His escape from the ice centre and pursuing Spetznaz...
